要如何修改期刊縮寫？  
→ 匯入 Journal term list

## 何時需修改期刊縮寫

- 當下載一筆書目進入 EndNote 時，系統會自動由下載的書目中擷取資訊建立刊名。如果下載時該資料庫的書目欄位中並未提供正確的縮寫刊名，其所建立的 Journals Term List 就不會有縮寫刊名；又或者下載時有縮寫刊名但其縮寫格式並非使用者想呈現的格式時，在編排論文的 Referances 時可能就會產生問題

# 修改期刊縮寫

- 方法一：匯入內建Term list
- 方法二：自行編輯

Comments and limitations:

This style is based on the *Publication Manual of the APA, 6th ed.*

Important Note: This style is based on some changes to the base reference type matrix of EndNote. For those of you using a version of EndNote prior to version X4.0.2 you will need to follow the instructions which can be found at:

<http://www.endnote.com/support/> Just search for "APA 6th"

The APA style is a very complex style. EndNote can handle most of the requirements of this style, but EndNote does not include the full spectrum of reference types that are described in the APA manual. If you are citing a reference type that is not included in EndNote, you should consult the APA manual. You may need to add or modify your own reference types, if so you can follow the instructions in the help file under "Adding and Deleting Reference Types."

若我的文章中，同時會引用中文和英文的書目格式，該如何將兩份文件合併呢？

"This new edition is needed to provide junior doctors and GPs with a comprehensive overview of urology focusing on the diagnosis and management of the most common urological conditions. Urology as a specialty is undergoing continuing technological and scientific innovation and there have been many recent changes to urology practice in favour of less invasive methods over surgeries. (Dawson & Nethercliffe, 2012) This edition will include the new techniques and procedures that have been developed since 2006 that allow for safer and more effective treatment"--Provided by publisher. Mumps, measles and rubella (MMR) are serious diseases that can lead to potentially fatal illness, disability and death. However, public debate over the safety of the trivalent MMR vaccine and the resultant drop in vaccination coverage in several countries persists, despite its almost universal use and accepted effectiveness. OBJECTIVES: To assess the effectiveness and adverse effects associated with the MMR vaccine in children up to 15 years of age. SEARCH METHODS: For this update we searched the Cochrane Central Register of Controlled Trials (CENTRAL) (The Cochrane Library 2011, Issue 2).
