安裝說明與工具介面介紹

※安裝EndNote時，請務必將開啟的Office文件關閉，才能順利安裝喔!

- 1.在單位的網頁上下載EndNote X7壓縮檔
- 2.回到桌面上，找到EN X7壓縮檔，按右鍵，解壓縮，再點開資料夾中的執行檔安裝

3.點選ENX7 Inst.msi 進行安裝
***License序號檔請勿刪除

請注意：
安裝前請關閉Microsoft Office、OpenOffice Writer與QuickStarter的功能為無開啟狀態)。

Typical的安裝

Typical(基本安裝)，安裝基本490幾種較常用的書目格式。

Custom的安裝

Custom(自訂安裝)，使用者可自行選擇個人常用的樣版來進行安裝或是安裝全部樣板(有5000多種書目格式)。

建立個人 EndNote Library 檔案

The important role of combined chemoradiation for several non-small cell lung cancer (NSCLC) is reflected by the large number of published research articles available, each with its own pros and cons. Highly cited articles were identified from the database Scopus. Among the 100 most often cited articles, 20 achieved a median of 200 citations, guidelines (n=397), phase II trials (n=211), phase I trials (n=758), and others. Numerous national and international cooperative groups and trials were actively involved in performing often cited, high-impact trials.

Biophysical mechanism of T-cell receptor triggering in a reconstituted system

John R. James & Ronald D. Vale

After introducing the T-cell receptor and other essential signalling genes, a non-immune cell is capable of displaying the early events of T-cell activation when placed in contact with antigen-presenting cells, and the initial signalling in this reconstituted system is shown to require the spatial reorganization of molecules at the cell interface.

Second cancer incidence and cancer mortality among chronic lymphocytic leukaemia patients: a population-based study

Abstract Patients with chronic lymphocytic leukaemia (CLL) are known to have increased risks of second cancer. The incidence of second cancers after CLL has not been reported in detail for Australia, a country with particularly high levels of ultraviolet radiation (UVR).

Methods The study cohort comprised of all people diagnosed with a primary CLL between 1983 and 2005 in Australia. Standardised incidence ratios (SIRs) and standardised mortality ratios (SMRs) were calculated using Australian population rates.

Results Overall, the risk of any second incident cancer was more than double that of the general population (SIR = 2.17, 95% confidence interval (CI) = 2.07, 2.27) and remained elevated for at least 9 years after CLL. Risks were increased for many cancers, particularly melanoma (SIR = 7.74, 95% CI = 6.85, 8.72). The risk of melanoma increased at younger ages, but was constant across >9 years of follow-up. Chronic lymphocytic leukaemia patients also had an increased risk of death because of melanoma (SMR = 4.79, 95% CI = 3.63, 5.90) and non-melanoma skin cancer (NMSC; SMR = 17.0, 95% CI = 14.4, 19.8), suggesting that these skin cancers may be more aggressive in CLL patients.

The Quality of Health Care Delivered to Adults in the United States

ABSTRACT

BACKGROUND

We have little systematic information about the extent to which standard processes involved in health care—a key element of quality—are delivered in the United States.

METHODS

We telephoned a random sample of adults living in 12 metropolitan areas in the United States and asked them about selected health care experiences. We also received written consent to copy their medical records for the most recent two-year period and used this information to evaluate performance on 439 indicators of quality of care for 30 acute and chronic conditions as well as preventive care. We then constructed aggregate scores.

RESULTS

Participants received 54.9 percent (95 percent confidence interval, 54.3 to 55.5) of recommended care. We found little difference among the proportion of recommended preventive care provided (54.9 percent), the proportion of recommended acute care provided (53.5 percent), and the proportion of recommended care provided for chronic conditions (56.1 percent). Among different medical functions, adherence to the process

ABSTRACT
Purpose: Plasma levels of selected hematopoietic cytokines: interleukin 3 (IL-3), stem cell factor (SCF), granulocyte-macrophage colony-stimulating factor (GM-CSF), granulocyte colony-stimulating factor (G-CSF) and macrophage colony-stimulating factor (M-CSF), and the tumor marker carcinoembryonic antigen 15-3 (CA 15-3) in breast cancer (BC) patients were investigated and compared to control groups: benign breast tumor patients and healthy subjects.
Material/Methods: Cytokine levels were determined by ELISA, CA 15-3 – using the CMIA method.
Results: A significant differences in the concentration of cytokines with the exception of IL-3 and CA15-3 between the groups of BC patients, benign breast tumor patients demonstrated higher or equal to CA 15-3 values of diagnosis and negative test results. The M-CSF area under the ROC marginally lower than the AUC of CA 15-3.
Conclusion: These findings suggest the usefulness of M-CSF between cancer and non-carcinoma lesions.
Key words: breast cancer, CA 15-3, HGFs, tumor markers

INTRODUCTION
Breast cancer (BC) is one of the most prevalent forms of cancer in women worldwide [1]. It is also one of the most aggressive malignant tumors associated with poor prognosis, rapid clinical progression, and a high rate of metastasis with the highest mortality [2]. Therefore, finding new substances

Abstract: Breast tumors are blindly identified using Principal Component Analysis (PCA) and Independent Component Analysis (ICA) of localized reflectance measurements. No assumption of a particular theoretical model for the reflectance needs to be made, while the resulting features are proven to have discriminative power of breast pathologies. Normal, benign and malignant breast tissue types in heterogeneous specimens were imaged *ex vivo* and a surgeon-guided calibration of the system is proposed to overcome the limitations of the blind analysis. A simple, fast and linear classifier has been proposed where no training information is required for the diagnosis. A set of 29 breast tissue specimens have been diagnosed with a sensitivity of 96% and specificity of 95% when discriminating benign from malignant pathologies. The proposed hybrid combination PCA-ICA outperformed diagnostic discrimination, providing tumor probability maps, and intermediate PCA parameters reflected tissue optical properties.

ABSTRACT

Background
Helping young people to avoid starting smoking is a widely endorsed public health goal, and schools are a route to communicate with nearly all young people. School-based interventions have been delivered for close to 40 years.

Objectives
Interventions prevent youth from starting smoking. Our objective was to evaluate the effects of theoretical, behavioural, and multifaceted interventions versus those focused solely on education.

High-proton-conductive polymer electrolyte with a nanomatrix channel was prepared by graft copolymerization of styrene onto deproteinized natural rubber followed by sulfonation with chlorosulfonic acid. (Kroger, 2011) First, natural rubber latex was purified with urea in the presence of surfactant to remove almost all proteins present in the rubber. Second, graft copolymerization of styrene onto deproteinized natural rubber was carried out with tert-butyl hydroperoxide/tetraethylenepentamine as an initiator at 30 degrees C in latex stage. Pioneers in avian intelligence have found that although birds' brains are very small, (Hagino, Hiryu, 2007; Irene M. Pepperberg, 1999) they are incredibly similar to the behavior or brain functions of humans. Examples range from the cockatoo who was the first animal to use tools (Pepperberg's in-depth studies done with the African grey parrot, *Alex* (EXperiment)). (I. M. Pepperberg, 2001) There have even been reports of birds successfully use, and even modify or build, tools. (Allen, 2004; Shanahan, 2012)

應用 EndNote 於 PowerPoint 中

EndNote X7 可以搭配 Microsoft PowerPoint 2007, 2010, 2013 進行引用。

Cite While You Write工具在PowerPoint中顯示的位置

以PowerPoint 2007為例

Insert Citation

1. 請先在Style中先挑選要套用的書目格式
2. 點選Insert Citation，會跳出一個EndNote Find & Insert My Citations視窗，在Find左方的空格中輸入查詢詞彙，點選Find。從查詢出符合的書目資料中選擇一筆或多筆後，點選Insert。

Insert Reference

1. 請先在Style中先挑選要套用的書目格式後，在PowerPoint的Slides中，將滑鼠游標放置於您欲插入引用書目的位置。
2. 點選Insert Citation，會跳出一個EndNote Find & Insert My Citations視窗，在Find左方的空格中輸入查詢詞彙，點選Find。從查詢出符合的書目資料中選擇一筆或多筆後，點選Insert。

在PPT中插入Reference

小提醒：不管在PowerPoint插入Citations或是References，都沒有參數存在，因此您皆可以利用原本PowerPoint所擁有的功能作編修的動作。

範例

- 點選Insert Reference，會跳出一個EndNote Find & Insert My References視窗，在Find左方的空格中輸入查詢詞彙，確認後，點選Insert。 (Eguizabal et al., 2013)
